Special Issue

Sustainable Remediation for Immobilization, Removal or Detoxification of Emerging Contaminants in Soil

Message from the Guest Editor

Soil is one of the most important natural resources, providing a wide range of goods and services, and chemical pollution is one of the greatest threats to it. Emerging contaminants (e.g., heavy metals, metalloids, PFAS, and microplastics) can accumulate in soil, potentially having toxic effects on human health and ecosystems and threatening the sustainable use and management of soil resources. Therefore, soil remediation is urgently required in order to clean contaminated soils. This Special Issue seeks contributions that focus on key topics:

- Sustainable ex-situ and in situ soil remediation based on single or integrated physical, chemical, biological, and thermal processes;
- Synthesis, characterization, and application of sustainable soil additives for the immobilization or removal of emerging contaminants from soils;
- Holistic assessment of sustainable remediation of contaminated soils;
- Management of the waste generated during sustainable remediation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
