Special Issue

Innovation and Sustainable Development of Remote Sensing Technology—2nd Edition

Message from the Guest Editors

Through the research and application of Earth and humanities-social sciences, we can better understand the Earth system and develop effective sustainable development strategies to contribute to the future of people and the planet. The fundamental elements in the pursuit of Earth science research are image processing and information extraction (such as land cover and land use (LCLU), geological disasters, geological lithology, etc.) by using machine learning and deep learning algorithms, which are gleaned from the advancements in remote sensing technology. Fusion and modeling of Earth and humanities-social data serve as a cornerstone for policy development and scientific research of sustainable development. This Special Issue, titled "Innovation and Sustainable Development of Remote Sensing Technology-2nd Edition", welcomes original studies on datasets, methodologies, and applications.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
