

Special Issue

Energy Security in the Context of a Sustainable Economy

Message from the Guest Editors

This Special Issue of Sustainability, “Energy Security in the Context of a Sustainable Economy,” seeks to advance scholarly understanding of the interdependencies between energy security and sustainable economic development. The focus is on attracting conceptual and empirical analyses that examine how secure, resilient, and low-carbon energy systems can underpin long-term economic sustainability goals. The scope encompasses research on energy policy, technological innovation, market mechanisms, governance frameworks, and the socio-environmental dimensions of energy transitions and how they affect durable and human-centric development. It aims to supplement the existing literature by linking traditional energy security studies with contemporary sustainability frameworks, thereby offering new insights into the dynamics of energy transition under conditions of global uncertainty, geopolitical shifts, and globally undertaken climate commitments. Interdisciplinary approaches, bridging segmented fields of study and work, are very much relevant to the aims and objectives of this Special Issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
