

## Special Issue

# Sustainable Corporate Governance and Social Responsibility

### Message from the Guest Editor

Corporate sustainability is a responsible business strategy to protect the financial, economic, environmental and social systems. Today, firms are held responsible not only for their financial operation but for the satisfaction of many stakeholder groups in a range of financial and non-financial issues related to the protection of the natural environment and social justice. All these concepts are now included under the concept of environmental, social and governance information (ESG). The main aim of this Special Issue is to examine the linkage between corporate sustainability, corporate social responsibility, corporate governance and ESG. More specifically, we are interested in addressing the following main research questions:

- How could corporate sustainability reporting (economic, environmental, social and corporate governance information) eliminate risks for stakeholders?
- How can corporate sustainability management practices affect the sustainability performance of business organizations and the decisions of stakeholders?
- How can corporate governance assist modern societies in protecting their operation?

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
