

Special Issue

Integrating Sustainable Development Goals (SDGs) into the Transformation of the World Economy

Message from the Guest Editors

This Special Issue explores the integration of the United Nations' Sustainable Development Goals (SDGs) into the evolving global economic landscape. As economies undergo rapid transformations driven by digitalization, climate action, and socio-political shifts, the need for sustainable economic policies and frameworks becomes increasingly urgent. It examines how SDGs can be systematically embedded into economic transformation at various levels—corporate, national, and global. Key topics include sustainable finance, circular economy models, social equity, and the role of digital transformation in achieving sustainability objectives. Contributions will highlight the interplay between economic growth and sustainability policies, offering insights into both theoretical frameworks and practical applications. This SI extends existing sustainability research by providing an interdisciplinary approach, integrating economic, scientific, and policy perspectives. It contributes to defining and measuring sustainability, assessing the impact of SDG-driven policies, and identifying best practices for businesses and governments based on data-driven decision management.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
