

Special Issue

Natural Resource Economics and Environment Sustainable Development

Message from the Guest Editors

In macroeconomic contexts, economic returns derived from the exploitation of natural resources often fail to guarantee the stable and constant growth of economic indicators, which, in correlation with consolidated energy consumption and economic growth, trigger numerous environmental degradation phenomena. The utilization of biological, mineral, energetic and environmental resources; pollution; and other environmental considerations have become fundamental issues to consider when predicting long-term economic growth possibilities. Therefore, for the evolution of sustainable development goals (SDGs), it is essential to determine whether and in what manner natural resources play a significant role in influencing environmental sustainability. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: Renewable and non-renewable natural resources; Pollution; Sustainable Development Goals (SDGs); Climate change; Natural resources; Political economy of natural resources; Cost-benefit analysis and environmental decision-making; Economic and political choices in solving environmental problems.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
