

## Special Issue

# Sustainable and Green Economy Transformation

### Message from the Guest Editors

In today's dynamic landscape, the imperative to shift towards sustainable and green economic paradigms is paramount. This Special Issue seeks to unravel the intricate web of interactions between sustainability and economic transformation, addressing the critical aspects within green finance, green real estate, and the development of sustainable cities. Our objective is to delve into how societies can make choices that balance environmental, social, and financial dimensions. We aim to foster a comprehensive understanding of the challenges and opportunities associated with sustainable and green economic practices, bridging theoretical insights with practical applications. We invite contributions covering a spectrum of themes, including the following:

- ESG (environmental, social, and corporate governance) integration in business practices;
- Urban economic strategies for green transformation;
- Renewable energy integration and transition;
- Smart and sustainable cities;
- Carbon emissions and climate change;
- Sustainable finance models and practices.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
