

Special Issue

Sustainable Supply Chains: A Catalyst for Global Development

Message from the Guest Editors

The extension of these sustainability concerns to suppliers is assured by effective sustainable supply chain management (SSCM). In an SSCM context, firms need to develop collaborative relationships to achieve sustainable outcomes and improve the sustainable performance of supply chains.

This Special Issue is concerned with innovative research that investigates the antecedents and the effects of SSCM in order to support global development. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Circular and closed-loop supply chains;
- Drivers and barriers to sustainable supply chain management;
- Sustainable supply chains and digital technologies;
- Sustainable supply chains and resilience;
- Sustainable supply chains and firm performance;
- Sustainable supply chains and Sustainable Development Goals (SDGs);
- Sustainable supply chains and Environmental, Social, and Corporate governance (ESG);
- Institutional pressures and sustainable supply chain management;
- Sustainable supply chains in industry-specific contexts.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
