

Special Issue

Agricultural Economics and Sustainable Agricultural Food Value Chains

Message from the Guest Editors

We cordially invite you to contribute to this Special Issue that targets analyses showcasing how market dynamics, policy interventions, and institutional changes can reorient agricultural economics toward more sustainable and resilient agricultural food value chains. The scope of this Special Issue is oriented toward topics such as agricultural value chain governance, resource efficiency, innovative circular economy models through the eco-design of agricultural value chains, and policy evaluation, approached through the lens of the urgency gained amid increasing market volatility, climate change, and resource scarcity. The papers published in this Special Issue should supplement the existing literature by moving beyond traditional efficiency-oriented one-sided analyses toward comprehensive systemic assessments of agricultural economies that account for environmental externalities, long-term resilience, and other drivers of sustainability for agri-food value chains. This special issue aims to offer innovative tools, methodologies, and policy insights to build sustainable agri-food value chains capable of addressing the challenges of the sustainable development agenda.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
