

Special Issue

Sustainable Biomaterials: Innovations and Applications in Environmental Engineering

Message from the Guest Editor

This special issue aims to publish the latest research results aimed at overcoming environmental problems using materials science and engineering for sustainability. This special issue welcomes original research articles and critical reviews. The following areas of research may be included:

- Preparation and evaluation of environmentally friendly materials.
- Materials recycling and waste management.
- Wastewater treatment
- Green materials for environmental purposes.
- Life cycle description of emerging materials.
- Advanced materials for energy production, storage and conversion.
- Emerging materials for oil and gas.
- Sustainability and the environment.
- Luminous materials for chemical detection of pollutants and medical imaging.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
