

Special Issue

Sustainable and Innovative Agriculture in Issues of Energy Production and Food Safety: 2nd Edition

Message from the Guest Editors

The main aim of individual innovative activities is the sustainable and economical use of resources combined with achieving environmental requirements and food safety. Agriculture plays the most important role in creating food security and safe food. The effects of activities used in agricultural production, taking into account environmental conditions, influence the availability of food as well as the quality of manufactured products. The use of various types of production systems, such as ecological or environmentally sustainable systems, and the implementation of innovative systems can influence the environment and thus food quality and consumer health. In turn, the search for and improvement of alternative energy sources is crucial for energy, environmental protection, and broadly defined sustainable development. The argument for exploring new technologies, including those using biomass and crop production, is the slow depletion of fossil fuel resources, including hard coal, lignite, oil, and natural gas. Decreasingly favorable forecasts cause these raw materials' prices to rise on the world market, which, without using new technologies, could lead to conflicts and crises.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
