Green Innovation and CSR: Driving Sustainable Solutions for Environmental Challenges

Message from the Guest Editor

Green innovation and corporate social responsibility (CSR) drive sustainable development by tackling climate change, pollution, and resource depletion. Green innovation involves eco-friendly technologies and processes that minimize environmental impact while boosting economic growth. CSR ensures businesses integrate environmental and social considerations into their operations, aligning strategies with sustainability goals. The synergy between green innovation and CSR enhances competitiveness, brand reputation, and regulatory compliance while advancing global sustainability. Companies adopting renewable energy, waste reduction, and circular economy models achieve long-term benefits. CSR initiatives like sustainable supply chains, carbon footprint reduction, and sustainability reporting foster stakeholder trust and societal well-being. By embracing green innovation and CSR, businesses can drive sustainable solutions, promote environmental responsibility, and ensure long-term resilience.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
