

## Special Issue

# The Twin Green-Digital Transition in the Built Environment: Multiscale and Interdisciplinary Perspectives

### Message from the Guest Editors

The digital and green transitions are redefining how sustainability is interpreted and implemented within the Architecture, Engineering, Construction, and Operations sector. Aligned with key European policy frameworks, emerging strategies move beyond energy efficiency to address resilience, health, and lifecycle-based responsibility. Digital technologies—such as BIM, Heritage BIM, Digital Twins, Extended Reality, and AI—are enabling integrated, data-driven workflows that support sustainable design, construction, management, and reuse of the built environment. This Special Issue aims to explore multiscale and interdisciplinary perspectives on the convergence of digitization and sustainability in the built environment. Contributions are encouraged to critically address spatial and temporal scales ranging from district and urban scales to individual buildings and construction systems, and to bridge disciplines such as architecture, engineering, environmental science, and data management.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
