Special Issue

Determinants of Sustainable Productivity Growth in Post-COVID Central and Eastern Europe

Message from the Guest Editors

During recent decades. Central European enterprises. economies, and whole societies have managed to build quite effective socioeconomic systems which are characterized by a high level of resilience and considerable sustainability potential. These characteristics have been confirmed during the COVID-19 pandemic. However, at present, growing socioeconomic instability has brought new multiscale challenges to the region, which are economic but also relate to new social and sociopsychological situations, which will force policy makers and managers to embrace a new wave of change. The effectiveness of these processes will shape the sustainable growth potential of the whole region in the coming decades. Therefore, the main objective of this Special Issue is to provide insights into the determinants of building a sustainable economic environment in Central European economies in the new and unstable post-COVID conditions. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
