

Special Issue

Sustainable Industrial Engineering and Logistic Management

Message from the Guest Editor

This Special Issue aims to explore the evolving landscape of sustainable logistics, focusing on integrating environmental, economic, and social considerations into modern supply chain practices. In response to growing global challenges, we seek to highlight transformative approaches and forward-thinking strategies that support the shift toward greener, more resilient, and collaborative logistic networks. We welcome the submission of both original research articles and comprehensive review papers. Topics of interest include, but are not limited to, the following:

- Modeling and optimization methods in sustainable logistic systems;
- Strategies for reducing carbon footprint and emissions in logistic systems;
- Collaborative logistic models and shared transportation frameworks;
- Reverse logistics: waste reduction and recycling approaches;
- The role of consumer behavior in shaping sustainable logistics.

We look forward to receiving your valuable contributions to this important discussion.

Guest Editor

Dr. Farnaz Ghazi-Nezami

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
