Special Issue

Sustainable Adoption of Innovative Digital Technologies in Digital Transformation

Message from the Guest Editors

Digital transformation (DT) is no longer an emerging trend; it has become integrated into national and corporate strategic agendas. It is considered a viable mechanism to realize the needed transformations in today's hyper-competitive environment. Within this context, DT could become a vehicle to achieve all 17 sustainable development goals (SDGs). In this Special Issue, experimental, case-based, qualitative, quantitative, survey, and review articles are invited to include areas of DT (but is not limited to) such as evolution and theory, ethics, organizational design, change management, implementation methodologies, service model, benefits and risks within the lens of sustainability, enablers and barriers, legal frameworks, and architectures. Further, the articles dealing with the adoption of DT in healthcare, education, smart cities, industry 4.0, government services, agriculture, and to support SDGs are also solicited. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA
