

Special Issue

Agriculture, Food, and Resources for Sustainable Economic Development

Message from the Guest Editors

Agriculture, food, and natural resources play a critical role in sustainable rural development by providing livelihoods, ensuring food security, and preserving environmental health. Sustainable agricultural practices conserve soil and water and reduce environmental degradation, thereby maintaining the natural resource base essential for future generations. Investigating sustainable agriculture, food systems, and resource management is therefore meaningful for assisting intervention designs that seek to boost rural incomes and foster inclusive economic growth and social stability. This Special Issue, entitled “Agriculture, Food, and Resources for Sustainable Economic Development”, aims to explore the intertwined relationships herein. You are welcome to contribute your submissions to our Special issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
