

Special Issue

Total Quality Management and Lean Manufacturing: A Total Sustainability Management Framework

Message from the Guest Editor

In this Special Issue, we encourage researchers to re-purpose or customize the systemic design of integrated management framework in order to contribute to the development a new operations management paradigm shift. A non-exhaustive list of possible topics is outlined below:

- Re-purposing total quality management into total sustainability management, from both a technical and conceptual perspectives.
- Can the contribution from lean to sustainability be extended beyond manufacturing processes?
- Which operation management tools can be re-purposed to measure and characterize sustainability issues?
- What are the boundaries of sustainable operations and supply chain management? Are there limits to what the discipline can achieve in terms of sustainability impact? What are the wider societal constraints to designing truly sustainable operations systems?
- How can we resolve the product-process divide in sustainable operations?
- Papers presenting operations solutions to legacy sustainability problems.
- Papers that empirically measure sustainability trade-offs

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
