

Special Issue

Innovative Risk Management and Sustainable Practices in Construction

Message from the Guest Editors

The realization of a low-carbon economy and the attainment of global targets in reducing the impact of climate change necessitate the consideration of sustainability risks within the risk management framework. Companies across various industries are currently challenged to align their business operations with sustainability requirements due to pressures stemming from regulatory bodies, market forces, and consumer demands. This issue also has implications for one of the largest sectors, the construction industry. We invite submissions of original research and reviews focused on various topics, such as the ones outlined below:

- Risk assessment and management;
- Innovative contracting models;
- Advanced and sustainable materials;
- Green building certifications/sustainability assessments;
- Life cycle assessment (LCA) and/or life cycle costing (LCC);
- Renewable energy integration;
- Waste management;
- Water conservation;
- Technological integration;
- Innovative contracting models;
- Data-driven decision making;
- Green infrastructure and construction;
- Risk management and innovative approaches;
- Reducing the weight of sustainable practices.

Guest Editors

Dr. Marzena Lendo-Siwicka

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
