

## Special Issue

# Corporate Environmental Management and Industry 4.0

### Message from the Guest Editors

The concept of Corporate Environmental Management (CEM) is already relatively well-settled in scientific-theoretical terms, and now faces the challenge of its extensive democratization.

The emergence of the Fourth Industrial Revolution (I4.0), ushering in a new era of information and automation technologies, will enable the gain of precision, scale, and safety for processes, ensuring their improved environmental impacts and generating greater profitability for organizations.

The scope of the Special Issue includes, but is not limited to, the following:

- Impacts of I4.0 on Corporate Environmental Management;
- Proposals for integrating I4.0 in Corporate Environmental Management;
- HR training on using I4.0 in Corporate Environmental Management-related processes;
- Contributions of I4.0 and Corporate Environmental Management to the achievement of UN Development Goals;
- Influence of I4.0 and Corporate Environmental Management on business strategy;
- Deploying of the binomial I4.0 and Corporate Environmental Management in the supply chain.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
