Green Supply Chain in Sustainable Enterprise Development

Message from the Guest Editors

Sustainable enterprise development increasingly relies on the integration of green supply chain management (GSCM) principles to address global environmental challenges and resource constraints. We welcome the submission of high-quality research and review articles that explore sustainable procurement, green logistics, circular economy models, low-carbon manufacturing, supplier collaboration, and digital technologies in GSCM. Emphasis will be placed on interdisciplinary approaches that bridge engineering, management, and environmental sciences to support decision-making for sustainability transitions.

Topics of interest include the optimization of green operations, the role of Industry 4.0 technologies in sustainable supply chains, environmental performance assessment, and regulatory or policy-driven frameworks for sustainable enterprise transformation. Submissions should provide rigorous empirical or theoretical contributions with clear implications for advancing sustainable practices and policies in supply chain networks.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
