Mental Health of People during COVID-19 and Beyond: The Situation, Adaptation, and Sustainability

Message from the Guest Editors

Over the past few years, the COVID-19 outbreak has profoundly impacted many aspects of people's lives. Many lives were lost during the pandemic, and not only because of the physical impact of COVID-19; mental health has also been affected, and many of those who died chose to commit suicide. Massive outbreaks of this type of disease are uncommon; it is estimated that they may occur approximately once per century. However, understanding the impact it causes is an academic necessity. This Special Issue seeks to answer questions regarding the mental health situation of different groups of people in various countries throughout the pandemic. It will also address how people adjust to and endure these dire situations. In this regard, it will also investigate those who are unable to adapt and/or survive these kinds of situations, and how can we prepare them or help them to cope if something like this happens again in future. The final question addressed by this Special Issue asks what lessons have we learned from this outbreak, and how can we use them to move towards sustainability again?

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
