

Special Issue

Intelligent Control, Optimization and Management of Sustainable Battery Energy Storage System

Message from the Guest Editors

Lithium-ion batteries play a crucial role in modern battery energy storage systems, and their rational utilization is vital for the global energy landscape shifting towards a sustainable development direction. However, due to the extremely complex application environment and the strong non-linearity and time-varying characteristics of lithium-ion batteries, the safety, durability, and reliability of the battery system remain significant challenges in real-world scenarios.

Progresses in these areas can not only significantly enhance battery efficiency and service life but also ensure operational safety, thereby accelerating the development of modern energy storage technology and enhancing its sustainability. To this end, we propose a Special Issue titled "Intelligent control, optimization and management of sustainable battery energy storage system". This issue aims to bring together researchers and engineers working on related topics, providing a cutting-edge platform to share innovative methods and significant research findings. We cordially invite submissions of original research papers, review articles, and interdisciplinary reports.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
