

Special Issue

Advanced Applications of Cleaner Production in Sustainable Industrial Ecology

Message from the Guest Editor

The depletion of natural resources and the impacts of waste emissions present challenges for modern society that must be addressed to ensure that future generations can live sustainably and with quality. Proposals that focus on resource recovery and reusing goods whose original functions have been exhausted represent strategic and urgent actions in pursuing a dynamic balance between the technosphere and the biosphere. This Special Issue intends to be a forum for scholars to discuss conceptual constructs and report experiences where such approaches have been applied. By coordinating efforts and collaborations, we can make concrete contributions that enable managers to navigate their decision-making processes and develop plans, policies, and projects, addressing the unavoidable aspects of the current context. With this in mind, colleagues, researchers, and managers are invited to join this initiative.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
