

Special Issue

Innovation and Technology for Sustainable Agriculture

Message from the Guest Editors

Agriculture has been facing several threats, such as climate change, water and land scarcity, soil degradation, urbanization and land use change, invasive species and diseases. While all these threats are daunting for the sustainability of food systems, innovation and technology may yield solutions in this era. In the classical sense the innovation and technology for sustainable agriculture include appropriate land, water, and nutrient management; pest control; crop cultivar selection and development; and farm equipment to improve crop productivity. In addition, biotechnologies, digital technologies, renewable energy technologies, and mechanization are also valuable directions. In this Special Issue, original research articles and reviews are welcome. Research areas may include: - Climate change impact, mitigation and adaption strategies

- Climate-smart farming
- Agricultural eco-efficiency
- Low-carbon agriculture
- Organic farming
- Urban agriculture
- Precision agriculture
- Values-based supply chains
- Nutrition and food systems education
- Soil nutrient management
- Water use efficiency
- Water quality management
- Social equity in agriculture
- Youth in agriculture

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
