

Special Issue

Sustainable Production and Consumption in Global Food Systems: Innovations and Socioeconomic Implications

Message from the Guest Editors

The global food system is facing the dual need to feed a growing population and minimize environmental degradation. In response, there is growing recognition of the necessity for sustainable production and consumption practices that balance food security with environmental protection. Recent innovations in the food sector offer promising opportunities for improving sustainability in food production, processing, supply, and marketing. However, the adoption of these advances, such as artificial intelligence, depends on their economic viability and the capacity in which they can be incorporated into existing food systems. This Special Issue, titled “Sustainable Production and Consumption in Global Food Systems: Innovations and Socioeconomic Implications”, aims to explore how innovations in the food sector can be helpful in providing support the sustainability of the entire food system. The focus is on understanding the socioeconomic implications of sustainable practices, from farm-level innovations to marketing and policy strategies, and how these can collectively contribute to more resilient and sustainable food systems.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
