

## Special Issue

# Sustainable Development Goals and Agri-Food Supply Chain

### Message from the Guest Editor

This special issue aims to provide a platform for researchers to present state-of-the-art and original works on how we can improve the sustainability in agri-food supply chains. The articles can also discuss how agri-food supply chains can contribute to achieving sustainable development goals and targets. If relevant, it would be helpful for authors to address - in their manuscripts and cover letters - which specific SDG their studies would be contributing. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- Challenges in waste reduction in the agri-food sector
- Data-driven methods to achieve sustainability in agri-food supply chains
- Possible circular pathways for the food supply chain
- Social sustainability (like working conditions, forced/fair labour practices) in agri-food supply chains
- Packaging and its impact on the sustainability of agri-food supply chains
- Sustainable sourcing and farming
- Sustainable distribution and packaging
- The role of consumers in achieving a sustainable food value chain
- Enablers for achieving Sustainable Development Goals in agri-food supply chains

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
