

Special Issue

Conservation and Enhancement of Biodiversity in Sustainable Cropping Systems

Message from the Guest Editors

In this Special Issue, we are looking for scientific contributions (i.e., articles, reviews, and short notes) that deal with the development of sustainable cropping systems through optimized plant diversification (varieties, ecotypes, landraces, and local wild species of agricultural interest) and enhanced ecological processes.

This Special Issue will focus on the following:

- Conservation and enrichment of plant collections;
- Selection of new plant germplasm;
- Development of protocols for the propagation and/or cultivation of new plant germplasm;
- Plant biodiversity role in shaping the ecological footprint of crop production;
- Reduction in chemical use in agriculture through increased biodiversity;
- Plant biodiversity impact on nutrient cycling processes and carbon storage in the soil;
- Promotion of biomass production through multi-species crop systems;
- Diversifying crop species to support pollinators and enhance natural pest management in agricultural environments.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
