# Impacts of Climate Change on Cultural Landscapes and Strategies for Adaptation

### Message from the Guest Editors

In recent decades, extreme weather and climate events have received increasing attention, as the frequency of disasters with high human casualties has escalated. While the urgent need to mitigate and adapt to climate change has been widely acknowledged at the international and national levels, less climate change responses have been implemented at the local level, particularly in cultural landscapes. As a component of cultural heritage resources, "cultural landscape" refers to a historic site that illustrates the interaction of humans with natural resources and the environment over time. Therefore, cultural landscapes are vulnerable to climate-related risks such as floods, landslides, and drought because of their reliance on the environment. The aim of this Special Issue is to foster discussions about policy recommendations and best management practices for improving cultural landscapes to be more resilient to climate change risks, as well as to introduce novel governance frameworks that encourage local stakeholders to participate in the decision-making and implementation stages.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
