

Special Issue

Innovations and Policies Shaping Sustainable Transportation Engineering

Message from the Guest Editor

In the ever-changing landscape of modern cities, sustainable transportation engineering has emerged as a crucial cornerstone for social, economic, and environmental equilibrium. This Special Issue, entitled "**Innovations and Policies Shaping Sustainable Transportation Engineering**", aims to investigate the intricate tapestry of contemporary transportation challenges and opportunities. The goal is to explore cutting-edge advancements, from connected and autonomous vehicles to the promotion of active transportation modes such as cycling and walking. The Special Issue also addresses pressing concerns of our time, including investigating methods to improve the quality of public transportation services, developing policies to reduce energy consumption and pollution, and proposing innovative approaches to alleviate traffic congestion and enhance road safety. **Keywords:** sustainable transportation engineering; connected vehicles; autonomous vehicles; shared mobility; electric vehicles; active transportation; public transportation service quality; energy consumption reduction; traffic congestion alleviation; road safety innovations

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
