

Special Issue

The Sustainable Development of Transportation

Message from the Guest Editors

Transportation systems become vulnerable under climate change disasters such as flooding, extreme weather, rising sea levels, and so on. The impact analyses of potential climate change on the transportation sector and strategies enhancing the resilience of transportation systems are vital to ensure the sustainable development of future transportation. To address the above problems, this Special Issue calls for multi-disciplinary research efforts based on novel methodologies, accurate data and/or diverse cases to shed light on the road to sustainable transportation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
