

## Special Issue

# Enhancement of Reliability and Sustainability in Electric Power Systems

### Message from the Guest Editors

The reliability and sustainability of modern power systems are critical, especially for infrastructure power systems. For example, a power grid is defined as strategic infrastructure where faults and an unsustainable power supply may have a negative economic, functional, and defensive impact on the whole country or its areas. The reliability and sustainability of power systems can be affected by several aspects. The first is the constantly increasing integration of renewable energy sources and distributed generation, increasing the risk of short circuits and over-voltages. These faults can cause significant damage to the power system. Therefore, it is important to develop modern protection methods and devices. The second aspect is cyber security. Cyber-attacks can cause confusion in the power grid's information systems as well as blackouts. The aim of this Special Issue is to bring together original, theoretical, and practical ideas, in the hope of developing future trends in the fields of power system reliability and sustainability.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
