

## Special Issue

# Opportunities and Challenges in Managing Circular Economy and Sustainable Development Goals for a Better and Cleaner Future

### Message from the Guest Editors

This issue will explore the opportunities and challenges in adopting circular economy practices across various sectors. The primary focus is to investigate how businesses, industries, and communities can implement sustainable strategies to minimize waste water, optimize resources, and reduce environmental impacts while maintaining economic competitiveness. The scope includes, but is not limited to, case studies, theoretical frameworks, policy analysis, and empirical research that examine the practical implications of circular economy principles. The purpose is to foster a deeper understanding of how integrated management systems (including waste and water management), renewable energy sources, food systems, and sustainable tourism can contribute to global sustainability goals, decrease environmental pollution, and improve the human health.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
