

Special Issue

Sustainable Remediation of Organic Pollution

Message from the Guest Editor

This Special Issue is dedicated to showcasing cutting-edge advancements and technological breakthroughs in the domain of soil organic matter pollution remediation. It will encompass a spectrum of topics, from the identification and assessment of pollution sources to the deployment of remediation strategies and technologies. The objective is to facilitate scholarly discourse among researchers, engineers, and policymakers, fostering a collaborative environment for the exchange of ideas and insights. This Special Issue will enrich the existing literature by showcasing thorough analyses of the origins, migration pathways, and ecological impacts of pollution, evaluating the efficacy of current remediation methods, and introducing novel remediation approaches and materials. This Special Issue will demonstrate the transformative role of remediation projects in catalyzing local economic growth, enhancing ecological landscapes, and improving quality of life for communities. It will provide a robust scientific foundation and practical guidance for the sustainable management of soil organic matter pollution.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
