Special Issue

Energy Consumption and Economic Growth

Message from the Guest Editor

This Special Issue aims to reach a broad audience of academic researchers, industry professionals, and regulators with novel research on energy consumption and economic growth. We welcome submissions that represent original, high-quality theoretical and empirical research, as well as policy-oriented research papers that provide definitive conclusions to advance the field of energetics, business, and economics. We particularly encourage research that focuses on energy and its effects on the economy—which have been profoundly transforming traditional markets—and, in turn, presents new challenges and opportunities for energetics and economic-growth research, including, but not limited to, climate/green, economics/competition, business/startups, and innovation/big data.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
