

## Special Issue

# Achieving Carbon Neutrality: Recent Progress of Sustainable Energy Economic, Energy Policy and Energy Transition

### Message from the Guest Editor

As is well-known, the process of energy transition is in progress, albeit at different paces, and with different underpinning strategies around the globe. As we approach mid- and long-term energy transition goal years of 2030 and 2050, respectively, it is a good time to check in and assess the progress to date, and prospects for the future. This Special Issue aims to consider how energy policies and economic initiatives aim to achieve carbon neutrality under the auspices of the energy transition. The overarching theme here will be sustainability, i.e., the ability of these approaches to engender a sustainable energy transition. This topic is strongly related to the journal's scope, particularly with regard to sustainability evaluations and sustainable development in the areas of socio-economic and integrated approaches to sustainable energy system development. Both original research articles and reviews are welcome in this Special Issue. I look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
