

Special Issue

Bioeconomy, Circular Economy and Sustainability: 2nd Edition

Message from the Guest Editors

The bioeconomy is made up of those parts of the economy that use renewable terrestrial and aquatic biological resources, such as forests, fish, and wildlife, to produce food, building materials, energy, medicine, and other essential items. It includes forestry and wood production, with the related biotechnological, chemical and energy industries, but also the provision of other ecosystem services that can support sustainable economic growth. Therefore, the purpose of the Special Issue will be to bring together scholars interested in the broadly understood bioeconomy, circular economy, agroforestry, climate change and sustainability. - Progress towards a sustainable bioeconomy;

-Good practices to operate the bioeconomy within safe ecological limits;

-Benefits of biodiversity in primary production;

-Circular economy;

-Agroforestry and its benefits;

-Climate change;

-Nonwood forest products;

-Constructing relations with the business environment (including customers);

-Education of stakeholders;

-Eco-innovations;

-Ecological trends in consumer behaviours.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
