Special Issue

Paths to Net-Zero Greenhouse Gas Emissions

Message from the Guest Editors

This Special Issue aims to understand existing and potential decarbonization paths to guide the transition to a net-zero emission economy. Subject areas may include but are not limited to, the following:

- Review articles that summarize the state-of-art of existing mitigation technologies in a particular field, including their prospects and technological readiness level for market penetration.
- Development of new technologies that aim to decarbonize a particular carbon-intensive sector, i.e., building space heating, steel production, and power generation.
- Framework or assessment of mitigation technologies that look at the life cycle, energy justice, environmental justice, etc.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
