# Sustainable Urban Landscaping for Resilience and Biodiversity Preservation

### Message from the Guest Editors

Sustainable urban landscaping is pivotal for enhancing urban resilience and preserving biodiversity in the face of rapid urbanization and climate change. This approach integrates ecological principles into the design and management of urban green spaces, aiming to create multifunctional landscapes that provide a myriad of ecosystem services. Key strategies include the use of native and drought-resistant plant species to reduce water consumption and maintenance needs, thereby promoting climate adaptability. Green infrastructure, such as urban edible gardens, green roofs, walls, and rain gardens, plays a crucial role in stormwater management, reducing runoff, and mitigating urban heat islands. Additionally, green spaces also act as habitats for urban wildlife, supporting a diverse range of species and contributing to overall biodiversity. This holistic approach not only addresses environmental challenges but also enhances the quality of urban life, making cities healthier and more livable for their inhabitants.

# **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
