

Special Issue

Interactions of Land Use, Economic Growth, and Greenhouse Gas Emissions in Sustainable Agriculture

Message from the Guest Editor

This Special Issue aims to explore the dynamic interplay between land use patterns, economic development, and greenhouse gas emissions within the context of sustainable agricultural practices. But it is not limited to these, and papers on related areas are also welcome.

- Land Use and Sustainable Practices: Examination of how different land use strategies impact sustainability in agriculture and how innovative farming techniques can contribute to efficient land use.
- Economic Growth and Agricultural Development: Analysis of the economic policies that promote sustainable agricultural growth and the economic impacts.
- Greenhouse Gas Emissions: Investigation into the contribution of agricultural activities to greenhouse gas emissions and the potential for mitigation through sustainable land use.
- Case Studies: Real-world examples of successful implementation of land use policies that have led to both economic growth and reductions in greenhouse gas emissions.
- Policy and Regulation: Discussion of the role of government policy and international agreements in shaping land use and promoting sustainable agriculture.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
