

Special Issue

Sustainable Built Environment and Green Building Design

Message from the Guest Editors

The aim of this issue is to highlight the importance of environmentally responsible solutions that support healthy, energy-efficient, and high-quality indoor environments for users. It can also focus on the issues of daylight and visual well-being, which are key aspects in the design of modern sustainable buildings. The Special Issue focuses on innovative approaches to sustainable building design, with a particular emphasis on indoor environmental quality, energy efficiency, and the integration of natural elements. The aim is to present new methods, tools, and strategies that support healthy and comfortable environments. The content includes theoretical and applied studies, case studies, and interdisciplinary research from the fields of architecture, construction, environmental engineering, and urban planning. A special section is dedicated to the assessment of daylight, visual comfort, and their connection with sustainable design. The Special Issue will complement the current literature by providing a comprehensive and updated perspective on the connection between sustainable design and daylight quality and visual well-being.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
