

## Special Issue

# Wind-Photovoltaic-Storage Hybrid Power System towards Sustainability

### Message from the Guest Editors

In recent years, new energy technologies have undergone a rapid development. However, due to the uncertainty in the output of new energy sources, the large-scale integration of these sources into the power grid poses significant challenges to the energy and power balance of the power system. Energy storage systems, with bidirectional power characteristics and flexible regulation capabilities, can help mitigate the fluctuations in new energy generation. Therefore, wind-photovoltaic-storage hybrid systems, incorporating wind power, solar power, and energy storage technologies, can effectively deal with this problem. Moreover, a wind-photovoltaic-storage hybrid system not only reduces the reliance on traditional fossil fuels and minimizes the impact on the environment, but it also enhances energy efficiency of utilization, making it a sustainably viable solution. In this Special Issue, original research articles and reviews are welcomed. Research areas may include (but are not limited to) the following: management, operation and control of wind-photovoltaic-storage hybrid systems.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
