

Special Issue

The Role of Public Policy in Managing and Ensuring the Sustainability of Public and Private Organizations

Message from the Guest Editors

In last decades, sustainability issues have gained significant attention in the academic and institutional spheres. Achieving tangible results in this regard requires a comprehensive approach integrating the principle of sustainability into policymaking at all levels of government, from the international to the local level. The Agenda 2030 for Sustainable Development emphasizes this role of local and national governments in achieving sustainable development, demanding a collective effort in improving public policies driven towards enabling sustainable development. In this Special Issue, we encourage researchers to submit novel papers covering all aspects of the connections between public policies and sustainability within organisations of all forms, contributing to the debate on government policy for sustainability. Submissions that are interdisciplinary, as well as those that are grounded in theory and/or empirical evidence, are highly encouraged. Collecting diverse perspectives from a public policy standpoint, this issue will have far-reaching implications for development and could improve practices and policymaking aimed at tackling the challenges of sustainable development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
