# Sustainable Development Challenges and Future Trends of Water-Energy-Food Nexus

### Message from the Guest Editors

This Special Issue of Sustainability calls for contributions of studies focused on the Water-Energy-Food (WEF) nexus strongly related to sustainability, which impacts all aspects of society, whether technological, economical, or social. The Water-Energy-Food nexus is a concept that highlights the interconnectedness of these three essential resources and their impact on sustainable development. Sustainable development challenges related to the nexus include an increasing demand for water, energy, and food due to population growth and urbanization, as well as the impacts of climate change on resource availability. Future trends in the Water-Energy-Food nexus include adopting integrated resource management approaches, such as water-smart agriculture and renewable energy technologies. There is also a growing emphasis on promoting cross-sectoral collaboration and stakeholder engagement to address the complex challenges of the nexus related to interconnectedness and opportunities for sustainable development by adopting holistic approaches to resource management towards achieving a more sustainable and resilient future.

# **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
