

Special Issue

Sustainable Development of Renewable Energy Policies and Technologies

Message from the Guest Editor

As the impacts of climate change appear all over the world, the importance of renewable energy such as solar and wind power is increasingly emphasized. The supply of renewable energy is expanding not only in developed countries but also in developing countries. However, countries around the world are facing two challenges in relation to renewable energy. Therefore, it is required to solve these challenges technically and at the same time to take policy measures for the solution. Indeed, renewable energy technologies and policies must promote sustainable development. The special issue invites contributions, including but not limited to the following detailed topics: Sustainable development of solar power; Sustainable development of wind power; Sustainable development of bioenergy; Causes of curtailing renewable energy power generation; Technological solutions to curtailment of renewable energy power generation; Expansion of renewable energy as distributed energy; Electricity island and renewable energy; Public acceptance of renewable energy; Power system reinforcement for renewable energy expansion.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
