

Special Issue

Environmental Protection and Sustainable Ecological Engineering

Message from the Guest Editors

In the past few decades, ecological engineering has proved to be a powerful tool for environmental protection. Ecological engineering is known to combine ecology and engineering to predict, design, construct or restore, and manage ecosystems which integrate human society with its natural environment for the benefit of both. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: Nature-based solutions for environmental protection. Green infrastructure.

Soil and water bioengineering techniques for environmental protection.

Efficiency of ecological engineering measures.

Life-cycle analysis of environmental protection measures.

Building Information Modeling for Environmental Protection.

Geo-environmental engineering.

Environmental science.

Socio-economic analysis of environmental protection.

Co-design and co-creation of environmental protection measures.

Geo-hydrological ecoengineering design.

Design for resilience.

Use of vegetation for environmental protection.

Geotechnical engineering.

Bio-stabilization and bio-reinforcement of soils.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
