Special Issue

Sustainable Agriculture: Cultivation and Breeding of Crops

Message from the Guest Editor

Sustainability in agricultural systems is one of the primary objectives outlined in the 2030 Agenda for Sustainable Development. For this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Cultivar Selection for water and nutrient efficiency
- Cultivar Selection for high temperature, drought conditions, organic agriculture, biofortification, high protein and vitamin
- Participatory Breeding
- Soil Management for Carbon Sequestration
- Crop Species Management
- Biological Products for Biotic Stress Control
- Emerging Technologies for Product Development
- Georeferencing and Industry 4.0 Technologies for Crop Management

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
