

Special Issue

Sustainable Waste Management in the Context of Circular Economy

Message from the Guest Editors

Changes in living patterns due to COVID-19 have significantly impacted the type and the characteristics of generated waste. The treatment of rapid waste in pursuit of sustainability has emerged as a major concern. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Policy plan, design, and framework for SWM within the context of the circular economy.
- Technology and its application for SWM.
- Improved method and its application for SWM.
- Environmental impact assessment assessing the environmental consequences of the policy, technology, and the method.
- Field monitoring to four parts with production, consumption, discharge, and disposal on a circular system.
- Country report introducing success stories.
- Additionally, other topics related to the keywords of waste; sustainable management; circular system; recycling and reuse; minimization; environmental assessment; policy and regulations; planning, design, and program; storage; collection; transport and transfer; landfill disposal; economic analysis, etc., are welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
