

Special Issue

Corporate Governance, Innovation Management and Sustainability Performance

Message from the Guest Editor

This Special Issue seeks to advance interdisciplinary research at the convergence of corporate governance mechanisms, innovation management strategies, and organizational sustainability outcomes. While existing literature has examined these domains independently, critical knowledge gaps persist regarding their dynamic interdependencies. The issue prioritizes three research vectors: (a) How governance structures shape innovative ecosystems.

(b) The mediating role of innovation capabilities in translating governance decisions into sustainability outcomes.

(c) Contextual factors influencing the governance-innovation-sustainability nexus across institutional environments. We welcome theoretical frameworks, empirical studies, and policy analyses addressing:

- Stakeholder-centric governance models for sustainable innovation.
- Digital transformation's dual impact on governance complexity and innovation efficiency.
- Metrics development for ESG-aligned innovation performance.
- Comparative studies across industries (e.g., energy, fintech, manufacturing) and regions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
