

Special Issue

Integrating Data Envelopment Analysis with AI and Digital Tools for Sustainable Solutions

Message from the Guest Editors

The integration of data envelopment analysis (DEA) with artificial intelligence (AI) and digital tools seeks to address pressing sustainability challenges and foster innovation. Consequently, this Special Issue focuses on experimental, computational, and theoretical studies promoting optimized and sustainable solutions across science, engineering, economics, management, and public policy. We encourage original works that integrate DEA with AI, machine learning, and data analytics to address complex issues of efficiency and sustainability, supporting the UN 2030 Agenda and Sustainable Development Goals (SDGs) while promoting open and replicable science.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
